American Internet Services (AIS) Announces Second Annual Technology Expo

SAN DIEGO – August 10, 2009 – American Internet Services today announced plans for the second annual AIS Technology Expo, a highly anticipated event showcasing southern California's vast technology community. The event is scheduled to occur on October 15th and promises to deliver a fusion of rigorous, cutting-edge technology as well as business and regionally diverse service providers.

As the cornerstone of San Diego's colocation community, AIS's intentions for the Technology Expo are clear; bring the local IT and business community together with the regions top service and infrastructure providers for an afternoon of collaboration, networking, and idea sharing. With a wide variety of attendees and exhibitors expected, guests will have the opportunity to learn about new business solutions and identify potential partners.

As an industry leader and good corporate citizen, AIS takes great responsibility in being an early adopter of new technologies which promote efficiency and ensure 'Green' Data Center solutions. One such example is the 80,000 sq. ft. Lightwave Data Center, a technology fortress which was recently awarded top honors for power conservation from SDGE during their 2009 Energy Showcase. As San Diego's largest and most technologically advanced Data Center, the Lightwave facility provides the perfect venue for this year's Technology Expo.

In addition to networking and business opportunities occurring at the event, attendees will also be provided with guided tours of this world class Data Center, which provides unmatched uptime and security for many of San Diego's businesses, both large and small.

"With the Lightwave Data Center as a backdrop, it's no wonder the event sold out to exhibitors as quickly as it did last year", said prior year's booth exhibitor, [Lunarpages](#)' Louie DiGiorno, "...even the most seasoned Data Center veterans are impressed by what this facility can offer. It's the perfect place to hold a technology event."

The Second Annual AIS Technology Expo will include:

- Technology and Service Provider Showcases
- Show Booths Featuring a Variety of Local and National Businesses
- Guided Tours of the San Diego's Largest Data Center – AIS's Lightwave Facility
- Contest to Win A Free Helicopter Tour of San Diego
- Gourmet Food and Beverages

Attendees will enjoy a relaxing afternoon of networking, business development, and interaction with a number of leading edge technology, hardware, and solution providers in addition to hundreds of their peers.

This event is FREE to attend, guests are asked to simply RSVP in advance. To do so, please send complete contact information to RSVP@americanis.net, and mark your calendars to enjoy a fun filled and educational afternoon exploring AIS's second annual Technology Expo.

Exhibitors Welcome - www.americanis.net/expo

AIS is now accepting applications for the 2009 Tech Expo, with the date fast approaching, companies who wish to participate in this exciting event are encouraged to act quickly to secure a booth. To receive information about participating as an exhibitor, please visit our website at www.americanis.net/expo and click on the link marked Exhibitor RSVP.

About American Internet Services

[American Internet Services](http://www.americanis.net) (AIS), San Diego's largest colocation company, has provided business-to-business services since 1994. The company currently owns and operates multiple data centers in San Diego, and has invested in state-of-the-art equipment and technology to ensure unsurpassed reliability, bandwidth, security, and redundancy for its worldwide clients. AIS' data centers are carrier-neutral facilities designed as technology fortresses with N+1 (or greater) redundancy in bandwidth, power, HVAC, fire suppression, and security. The data centers offer a mix of cabinet, cage and data suites, as well as roof rights for microwave links and other antennae systems. For more information, visit www.americanis.net.
